Education

Indian Institute of Information Technology, Guwahati

M.Tech in Computer Science and Engineering

2025 – 2027

CGPA: 8.53 / 10

Cotton University, Guwahati

Master of Computer Applications (MCA)

2020 – 2022

CGPA: 7.83 / 10

Technical Skills

Languages: C/C++, Python, JavaScript (ES6+)

Backend : Node.js, Express.js, Python FastAPI

Frontend: HTML, CSS, ReactJs, Bootstrap

Databases & Tools : MySQL, MongoDB, Git/GitHub, Postman

AI / Frameworks: Machine Learning, Hugging Face Transformers, LLM Safety Guardrails

Projects

Reward+: Redeem Code Application

2024

Tech Stack: Kotlin, Node.js, MongoDB, React, REST APIs, Hostinger VPS

Google Play Store

- Architected and deployed a production-grade Android application serving **50,000+ active installations** on the Google Play Store with high availability and seamless UX.
- Designed a scalable, fault-tolerant backend service using Node.js and MongoDB to securely handle transactional user points, reward redemptions, and real-time state synchronization.
- Implemented robust backend API validation and rate-limiting to safeguard digital rewards against fraud and payload manipulation.

EduchainX: Blockchain-Based Academic Certificate Verification System

2025

Tech Stack: React, FastAPI, Node.js, MongoDB, Solidity, Ethereum, OCR

Live Preview

- Built a blockchain-based platform for issuing and verifying academic certificates, enabling employers and institutions to independently validate credentials without relying solely on manual verification.
- Implemented Ethereum smart contracts to store tamper-evident certificate hashes and transaction records, providing an auditable verification trail while keeping sensitive certificate data off-chain.
- Designed a microservices-based architecture using React, Node.js, FastAPI, and MongoDB to support certificate issuance, verification, and institutional management workflows.

Research Project : Benchmarking LLM Safety Guardrails on Indian Languages

2026

Tech Stack: Python, LLM and Guardrails, HuggingFace Transformers, Sarvamai/Sarvam-Translate

GitHub Link

- Built end-to-end evaluation pipeline to assess production safety guardrails (Llama Guard 3, Qwen3Guard, NemoGuard) on harmful and Benign prompts across 6 Indian languages + Hinglish code-switching
- Measured Attack Success Rate (ASR), False Positive Rate (FPR), and F1 across 8 language variants, discovering 16× safety degradation on Tamil (2% → 32% ASR) vs English for Llama Guard 3

Experience

Tech Savvy

Mar 2022 – Jul 2022

Software Developer Intern

Guwahati, India

- Worked on a **School Management System** using **Laravel (PHP)** and **MySQL**.
- Developed an **Admission Portal** where students could fill out admission forms and submit their applications online.
- Developed a **Teacher Onboarding System** for teacher registration and maintaining teacher informations.

Achievements

- Qualified GATE Computer Science 2026**
- Top 10% Nationally — Google Big Code Challenge:** Selected for Round 2 among the top 1,500 participants out of 15,000+
